

R R STONE COMPANY

INTENSIVE CLEANER

R R Stone Intensive Cleaner is a very effective solvent-containing water based cleaner for stone, plastic and other surfaces.

R R Stone Intensive Cleaner will remove simple stone impregnators, light oils, grease, some waxes, emulsion polishes and some simple paints as well as general dirt and soiling.

Intensive should be used to prepare soiled surfaces for application of R R Stone sealants and other surface treatments, when ever such contamination is present or suspected. Intensive is perfect for routine cleaning of lightly soiled oily / greasy floors / surfaces / equipment etc.

This product will remove fresh cement and grout deposits but not cured residues.

APPLICATION

Remove all loose dust and debris and ensure surface. Allow to dwell on the surface until soiling is loosened, if necessary agitate with wire wool/stiff brush and allow to dwell for further period. DO NOT ADD WATER.

After approx. 15-30mins, rinse off with cold water, scrub with brush if necessary and extract with wet vacuum or squeegee.

Rinse and vacuum – repeat if necessary.

Allow surface to dry.

For routine cleaning dilution with hot water at a ratio of 1:5 to 1:200 depending on the degree of soiling. Mop up and rinse with clean water.

When dry, polish off smooth surfaces with a dry cloth to avoid 'water drying' marks.

HEALTH AND SAFETY

Keep away from children

Do not swallow

Avoid contact with skin or eyes - use rubber gloves, goggles etc. If in contact with skin, rinse thoroughly with water and dry off.

If swallowed, give milk or cream and seek medical attention- DO NOT INDUCE VOMITING.

AVAILABILITY

250ml, 1 litre and 5 litre cans/bottles.
