

RR STONE
Solutions for Stone

Maintenance is a very effective solvent-containing water based cleaner for stone, plastic and other surfaces.

Maintenance will remove simple stone impregnators, light oils, grease, some waxes, emulsion polishes and some simple paints as well as general dirt and soiling.

Maintenance should be used to prepare soiled surfaces for application of R R Stone sealants and other surface treatments, when ever such contamination is present or suspected.

Maintenance is perfect for routine cleaning of lightly soiled oily / greasy floors / surfaces / equipment etc.

This product will remove fresh cement and grout deposits but not cured residues.

APPLICATION

- Remove all loose dust and debris and ensure surface is dry.
- To remove oil, grease etc apply Maintenance neat to the surface be treated with a soft brush, roller, spray etc.
- Allow to dwell on the surface until soiling is loosened, if necessary agitate with wire wool/stiff brush and allow to dwell for further period. **DO NOT ADD WATER.**
- After approx. 15-30mins, rinse off with cold water and extract with wet vacuum or squeegee.
- Rinse and vacuum – repeat if necessary.
- Allow surface to dry.
- For routine cleaning use at a dilution of 1:5 to 1:200 depending on the degree of soiling in hot water mop up and rinse with clean water.
- When dry, polish off smooth surfaces with a dry cloth to avoid 'water drying' marks.

HEALTH AND SAFETY

- Keep away from children
- Do not swallow
- Avoid contact with skin or eyes-use rubber gloves, goggles etc.
- If swallowed, give milk or cream and seek medical attention- **DO NOT INDUCE VOMITTING.**
